

Hello,

I would like to address the Low Power FM service. It has come to my attention that LPFM stations may take priority over already established FM translator services. If this is the case, I may lose my favorite radio station K-LOVE. I feel that the services that K-LOVE provides far outweigh anything that could come on with the new LPFM stations. If our community loses K-LOVE, there will not be a positive message on the radio. We will be forced to listen to all the rubbish on the radio these days provided by other stations. It is hard enough to get away from it all as it is, and if our only source of positive, encouraging music is taken away, it will only get harder to tune out the garbage. Please allow K-LOVE to remain a priority in our community. Thank you for your time.

Regards,
Christopher Watson
